

Limor Landsman is an associate professor in the Faculty of Medicine at Tel Aviv University. She obtained her M.Sc. and Ph.D. degrees from the Weizmann Institute of Science and completed her postdoctoral training at the UCSF Diabetes Center. Prof. Landsman's research group focuses on studying β -cell development, function, and proliferation, with a particular emphasis on investigating the influence of the pancreas microenvironment on these processes. In a series of recent studies, her lab has pioneered research on pancreatic pericytes, identifying them as crucial components within the cellular network governing glucose regulation and diabetes.
